

GLASSWAP FINANCE

What is Glasswap Finance?

Ever wanted to taste some good WINE? Our Bartender is ready to offer you a great variety of wine. You can taste it on our brand new Glasswap Finance.

Our dApp runs on the Binance Smart Chain. Why Binance Smart Chain? It has low fees and it is accessible to everyone

How to do that?

It's easy. Install your Metamask wallet and connect it to the Binance Smart Chain, then you just need to own some BNB into it.

OUR PLATFORM

What can you do on Glasswap Finance?

The best WINE bar can offer you some good WINE. How to buy that? Just choose Trade>Exchange and you'll be redirected to Pancakeswap Trade page where you can buy our WINE token (see WINE token section for more info on our token).

You can provide some liquidity to earn revenues on your deposits. Choose Trade>Liquidity and you'll be redirected to Pancakeswap Liquidity providing page. Always remember to stake 1:1 value.

Farms

Yield Farms allow users to earn WINE while supporting Glasswap by staking LP Tokens. We will not own your LP token, you will be always able to withdraw it directly from Pancakeswap Website. We won't charge any fee if you stake our native token's LP-token. There's a 3% deposit fee on the other farms. We hope to remove them when our platform will be famous enough.

When staking into farm pools, choose wisely from APR: that's a projection of what you are going to earn. Be aware that APR is calculated on previous data.

Yield Farm APR calculation includes both the rewards earned through providing liquidity and rewards earned staking LP Tokens in the Farm.

Previously, rewards earned by LP Token-holders generated from trading fees were not included in Farm APR calculations. APR calculations now include these rewards, and better reflect the expected APR for Farm pairs.

Pools

As for Pancake Syrup Pools, you can stake your token to earn some WINE. Staking WINE will charge 4% deposit fee. You'll be charged a 3,5% deposit fee for depositing other tokens into syrup pools.

NEW: Wine Bar (Launches on 19th Aug)

What can we do with WINE any more? Well you can easily earn other tokens on our WINE BAR. How?

Stake WINE token to earn DOT, BTCB, USDT, CAKE and even more tokens. You will be charged a 1% deposit fees for the WineBar staking pools.

Why we charge deposit fees?

Unfortunately, deposit fees are vital for a new dAPP. It gives new liquidity for marketing purposes. What we are going to do with deposit fees?

Half of it will be used to buy back and burn WINE, so we will always keep our bar fresh (otherwise WINE turns into winegar).

We will use deposit fees to buy tokens and put them into Winebar.

We hope to delete deposit fees so we will be able to offer a completely free of charge yield farming to our customers.

Our WINE token

You can find all the informations about our token on
<https://bscscan.com/token/0xc0699dcdf5ae66d36881cae93120c851db6986c1>

Our contract address is **0xc0699dcdf5ae66d36881cae93120c851db6986c1**

Dev won't control any preminted token. This is to demonstrate the genuinity of our project.

Emission block rate is set on 2/block. 10% of minted token will be sent to our Development and Marketing Wallet. Most of them will be used to execute daily and weekly burns. Some of them will be added into liquidity pool.

Our Roadmap

Platform Launch is scheduled at block #9960000, approx. 12th August.
Winebar opens on 19th August. Just giving some time to start our platform.

12 Aug – 19 Aug

We will execute a daily burn of WINE to maintain token price. We'll use some of the deposit fees to destinate into Winebar opening on the next week. Half of deposit fees will be used to buy back and burn Wine tokens.

19 August: Winebar opens

Winebar deposit fees daily burnt

We will start publishing new launchpads on Winebar. If you want your project to be on Glasswap, send us an email to our official mail.

Marketing all over Q3-Q4 2021

September 2021

We plan to create a new platform on Polygon. Work will start on September, we schedule to launch it on first half of October 2021.

We are also planning to launch our own reflection token. By holding it you'll receive WINE as reward. That's right, you'll earn WINE without staking anything, just hold our reflection token.

Before new platform launch, we plan to integrate our AMM that will substitute Pancakeswap in providing liquidity on our platform.

Lottery

Between the end of August and the beginning of September, we'll integrate our Lottery Smart Contract.

Lottery is a good way to burn some WINE

Q4 2021

More features will be added after launch:

AMM, Polygon Platform, NFT Marketplace

Q1 2022

Multichain platform

Layered Farming

BECOME A BARTENDER

If you want to be part of our team send a mail to our official mail.

We're hiring:

- Solidity Engineers,
- Graphics,
- Website maker,
- Community Mods

If you want your project to be on Glasswap, write to our official mail.
